How to Build a Whistle Kit

**Whistle and community safety info for free distribution**

Materials:
Zine in English and Spanish
PIRC hotline flyer
Whistle on string/lanyard

1. Layer zines and flyer on top of the whistle string.

2. Bring the whistle across the top of the packet and thread it through the open loop, pulling it tight.
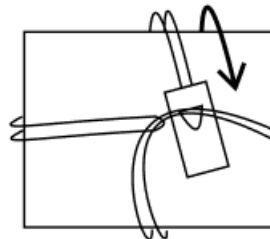

3. Move where the loop and string meet to the center of the packet.

4. Wrap the whistle under and around the packet, bringing it back to the fop.

5. Tuck the whistle under the string. Pull tight and wrap multiple times if needed.
